

DINAM COMPANY TOUR AT A GLANCE

DINAM would like to present herself to you. Dinam was found in 2004 and grown quickly. We start with fluorescent but later change our focus to LED lightings. We now are sophisticated manufacturer of 500 people.

I. Research and Development: originated from OEM, we develop our own products. We are professional manufacturer with advanced lighting fixture and source design methodologies.

II. LED SMD package: we purchase high quality led chips from Taiwan, and encapsulate led chips in our factory. Make sure that the uniformity of color temperature, quality, and delivery time.

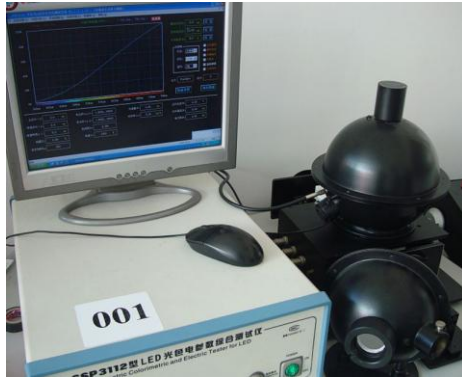

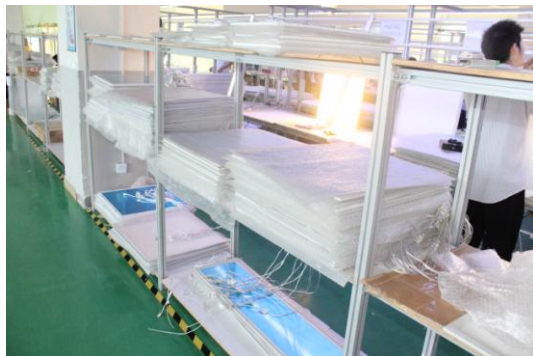

III. LED panel production workshop

Three laser engraving machines to engrave dots on the Mitsubishi light guide plate. This technology make sure that the even and well distributed lighting effect will not change, not like the ink printing method which the ink will fade out after using for a few months.

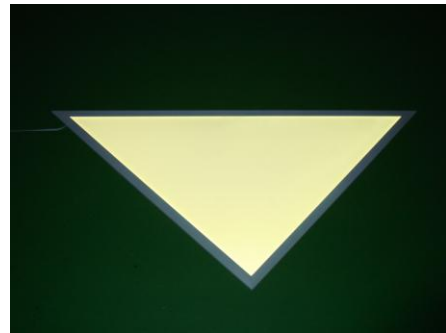

IV. Clean and dust-free workshop: to make sure the products are being produced with great effects.

V. OEM service

Different shapes and sizes of led panel lights:

Excellent materials:

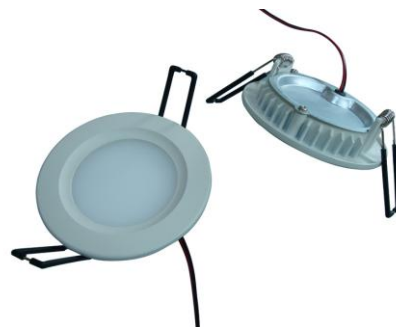

Lately developed COB Ceramic housing high brightness spot lamps:

Customized colors like silver, milky white, creamy white, black and others. (Special colors needs MOQ)

VI. Elegant designs:

Nice and well printed aluminum frame

High lumen output: high brightness 3528, 5050, or 5630 as light source.

State-of-art technology and nice craftsmanship: to make every detail perfect.

VII. Product Gallery:

We wish you had a nice tour.
